

Security Assessments

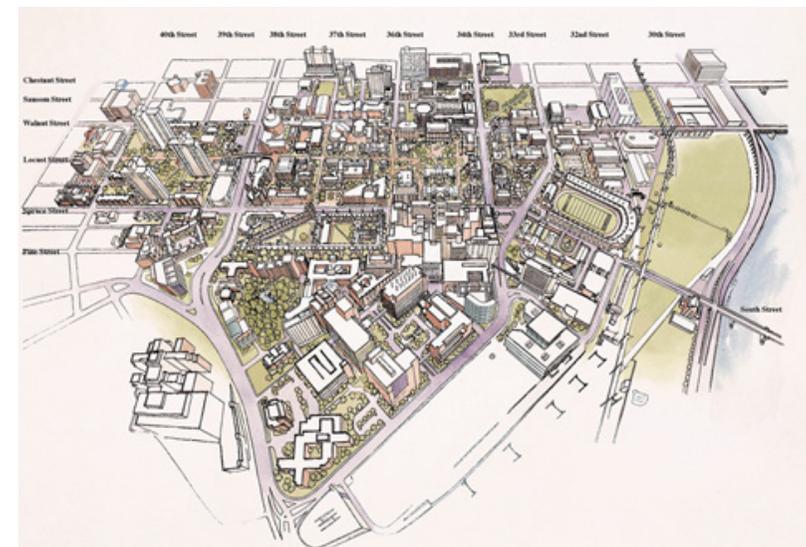

SHEN MILSOM & WILKE

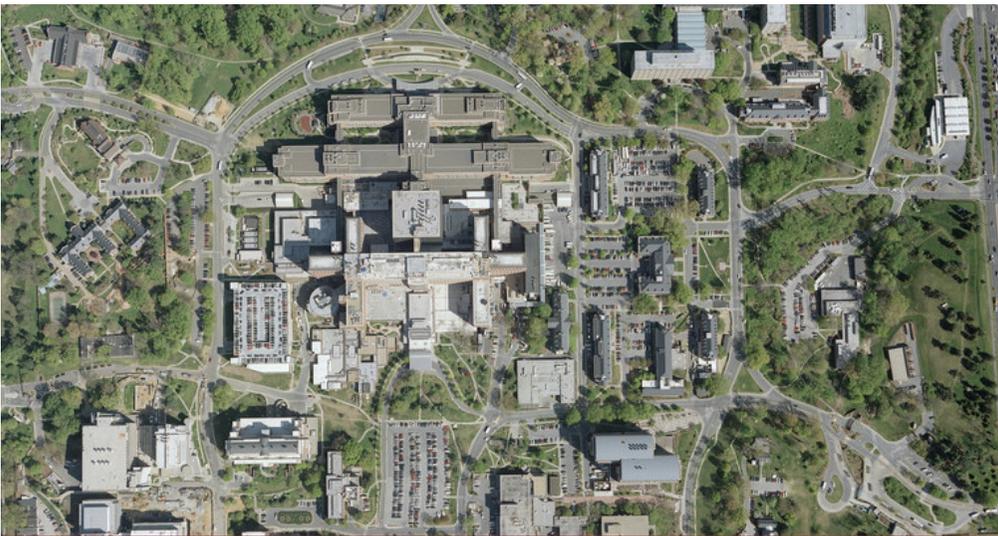

WHO WE ARE

SM&W's core purpose is to provide guidance and creative technology solutions to make the places we work, play, learn and live more functional, safe, and welcoming.

Founded in 1986, Shen Milsom & Wilke, LLC is an independent, internationally recognized technology consulting firm with 15 offices on three continents. Our areas of practice include healthcare, higher education including medical education, science + technology, hospitality, mixed use, corporate, and government. The convergence of our expertise in Audiovisual, Acoustics, IT, Security, and Medical Equipment Planning strengthens the design process and leads to improved outcomes for our clients.

SM&W delivers a consistent methodology both locally and globally. Our approach has been the key to the successful delivery of over eighteen thousand projects in more than 40 countries. Our shared infrastructure includes a training and education program and a consistent delivery process.

An integrated security design is made up three integral components:

- > **Architectural**
- > **Operational**
- > **Security Technology**

SM&W is able to **assess** and **evaluate** physical security from an objective standpoint, putting your employees, students, and tenants first.

From educational campuses, to secure, sensitive compartmented information facilities (SCIFs), our **Security Team** offers these comprehensive services:

- > **Risk & Vulnerability Assessments**
- > **Security Survey & Needs Assessments**
- > **Security Program Audits**
- > **Life Cycle Assessments**
- > **Policy & Program Assessments**

Shen Milsom & Wilke is known for establishing effective security programs by utilizing a balance of physical, operational, and technical innovations.

Our security solutions are tailored to the needs of individual clients via a comprehensive needs analysis which allows us to be selective with mitigation techniques that range from well-established to cutting edge. To provide adequate protection for your project, we make sure all physical, operational and technical elements operate in concert with one another.

SM&W is an independent consultant. We pride ourselves on our loyalty to clients, independent of vendors, manufacturers or integrators. Our impartiality means that we are able to craft an objective and appropriate solution that is specific to your project's operational goals and budget.

WHAT WE DO

SM&W's comprehensive and integrated security approach will save time, money and lives.

When considering the implementation of an effective security posture, SM&W looks beyond the individual asset or area we want to protect. Integrated security means a change of mindset, which will ultimately lead to better results. Rather than simply thinking about how to stop a threat once it arrives, we look at how to prevent or disrupt threats before they even occur.

SM&W understands a security system should be designed to provide a facility and/or campus with the operational flexibility to provide layers of security. Our team uses a 5-layered approach to assess security; starting outside and working our way through a building or set of spaces. Areas we assess include:

- > Risks and Threats
- > Security Technology and Systems
- > Security Infrastructure
- > Policies and Procedures
- > Security Standards
- > Crime Prevention Through Environmental Design (CPTED)

OUR SECURITY LEADERS

From prior law enforcement officers to previous risk analyzers, our security team has a wealth of knowledge based on real life experience. Our leaders work together to deliver consistent and secure evaluations, standards, and risk mitigation tactics. Our security team is made up of over 20 qualified professionals, with a reach that extends to all corners of the globe.

- > National Museum of the U.S. Army Security Risk Assessment, Fort Belvoir, VA
- > The Hills Residential Towers Security Risk Assessment, Dubai, U.A.E.
- > Tradewinds Square Security Risk Assessment, Kuala Lumpur, Malaysia

"In 2016 and 2017, the City of Thornton had the pleasure of working with Shen Milsom & Wilke on accessing the security needs and concerns of our facilities. Their security consultants toured all city facilities and put together a comprehensive security assessment plan for the City of Thornton that was highly professional, detailed, concise, and within our budget needs. The security consultants were well trained, very knowledgeable, professional, and great to work with. They listen to our concerns and our needs and addressed them in highly proficient manner. The City of Thornton is now implementing their assessment plan throughout the city with great success.

I would highly recommend Shen Milsom & Wilke, LLC to any company and/or organization that is looking for a plan to upgrade their facilities security, you will find this company knows their customers security needs and is great to work with."

— Joe Stover, Maintenance Services Manager
City of Thornton, Co

Confidential Client Security Risk Assessment KUALA LUMPUR, MALAYSIA

SM&W conducted a security risk assessment for a new, to be constructed project located adjacent to the Jalan Perak and Jalan Sultan Ismail areas of Kuala Lumpur. Because the design and construction was still in progress, our focus was the development's proposed functions and design as well as physical assets.

IS YOUR ENVIRONMENT SECURE?

The reality of today's society requires security to be at the forefront of the places we work, learn, live and play. Take the quiz below to find out!

1. Is your campus or facility's perimeter adequately protected?

YES NO

2. Is every one of your doors equipped with locking devices?

YES NO

3. Have you defined written procedures in response to alarm activations?

YES NO

4. Do you regularly test your security system?

YES NO

5. Do you have well-defined standards for personnel and technology deployments?

YES NO

6. Are visitors required to show proper identification upon arrival?

YES NO

7. Is there a parking control program in place?

YES NO

8. Does your pre-employment evaluation include verifying criminal records?

YES NO

9. Have you recently completed a threat matrix?

YES NO

10. Do you have effective video surveillance in place?

YES NO

If you answered "NO" to any of these questions, you might need to address your security strategies.

Confidential Security Assessment

EUROPE

SM&W provided an assessment and recommendations for existing conditions of the security and video surveillance systems and all of its connected components for a large multi-acre, multi-building high security site in Europe. SM&W's focus was to provide a more robust security posture moving forward.

Located globally to better serve you.

Shen Milsom & Wilke is an international firm of more than 200 talented and dedicated professionals who provide technology and design consulting for new construction and renovation projects of all sizes.
